EXPERIENCE

Blue Foundry Bank, a division of Fulton Bank | Digital Banking Support Specialist

Parsippany, NJ | Feb 2026 - Aug 2026

- Supported digital banking and payment operations for 600+ consumer and business users, serving as a Tier 3 escalation resource for online banking, Zelle, debit cards, ACH, treasury services, wires, and Reg E-related cases.
- Coordinated with vendors and internal stakeholders on platform issues, vendor tickets, system changes, and approximately three production releases per month; completed UAT and post-release validation to support operational readiness.
- Led annual Cash Management reviews for 120+ commercial relationships, documenting findings, following up on outstanding requirements, and supporting sound controls and client service.

COCC | Customer Support Coordinator II

Remote / Southington, CT | Feb 2021 - Sep 2024

- Provided Tier I and Tier II fintech support to 60+ financial institutions, resolving 50+ daily cases involving online banking, debit cards, Bill Pay, EFT/payment systems, access, configuration, and transaction issues.
- Partnered with financial institution clients and internal technical teams to investigate production issues, identify trends, communicate impact, and drive cases through resolution.
- Supported digital banking and Bill Pay conversions through implementation and post-production stabilization, helping clients navigate system changes and operational impacts.

PNC Bank | Assistant Branch Manager / ACCEL Retail Bank Development Associate

Newark, NJ | Oct 2013 - May 2018

- Led daily branch operations with responsibility for transaction quality, cash controls, audit readiness, regulatory compliance, risk management, staff coaching, and client issue resolution.
- Delivered digital banking, treasury, and payment solutions to consumer and business clients, including processing wire requests and ensuring accuracy and adherence to policy.

East Orange Senior Citizens Housing Corporation | Program & Community Outreach Director

East Orange, NJ | Aug 2015 - Dec 2025

- Directed programs, events, vendors, transportation, outreach, and resident communications across two senior housing properties serving more than 300 residents.

PROJECTS / PORTFOLIO

[Facebook Engagement Prediction](#) | [The Knowledge House](#) | [Collaborative Phase 2 TEPP](#)

Modeling, preprocessing, analysis, and documentation

- Developed a baseline Random Forest Regressor that explained 51% of test-set variance in scaled likes and a three-cluster K-Means model segmenting 500 posts into normal, above-average, and viral performance groups.
- Led preprocessing decisions; contributed correlation analysis, feature reduction, repository formatting, Tableau dashboard design, and co-authorship of the revised README and final report.

Tools & Technologies: Python, pandas, NumPy, scikit-learn, Seaborn, Jupyter Notebook, Tableau, Git/GitHub

[U.S. Gas Prices, Crude Oil & Inflation \(2023-2026\)](#) | [The Knowledge House](#) | [Collaborative Analytics Project](#)

Data preparation, comparative analysis, visualization, and documentation

- Prepared and aligned weekly gasoline and crude-oil data for a shared 2023-2026 window; merged the price series by weekly period and normalized gasoline, crude-oil, and CPI values for visual comparison.
- Developed a normalized trend visualization and crude-oil versus gasoline scatterplot with a trendline, documenting similar directional patterns and greater price volatility than CPI.

Tools & Technologies: Python, pandas, NumPy, Matplotlib, Jupyter Notebook, EIA Open Data, FRED data, Git/GitHub

EDUCATION

Rutgers University | B.A., Human Resource Management & Africana Studies

The Knowledge House | Data Analytics Innovation Fellowship, Expected Sep 2026

Cisco Networking Academy | Computer Hardware Basics; Operating Systems Basics

PROFESSIONAL SUMMARY

Banking technology and financial services professional with 10+ years of experience across digital banking, payments, fintech support, banking operations, and operational controls. Experienced in platform support, production issue resolution, UAT, release validation, vendor coordination, process documentation, and risk-aware execution. Applies Python, machine learning, and data visualization to business questions while bridging operational and technical teams.

TECHNICAL SKILLS

Python • pandas • NumPy • scikit-learn • Matplotlib • Seaborn • Tableau • SQL • Jupyter Notebook • Git/GitHub • Microsoft 365 • SharePoint • CRM & Ticketing Systems • Digital Banking Platforms • Fiserv • COCC
